These terms and conditions shall be incorporated into every order of the Customer.
- 3.2 The Customer acknowledges that these terms and conditions are meant to be read in conjunction with the terms and conditions supplied by a utilities operator such as SA Power networks (<https://www.sapowernetworks.com.au/data/3027/model-standing-offer-terms-conditions-for-basic-connection-services-for-retailer-customers-who-are-small-generators-3602/>) in relation to the installation of a Small Embedded Generator (SEG) (where a SEG is supplied as part of, or in conjunction with, any works provided under this agreement). Under those terms and conditions the Customer is required (to ensure the SEG remains safe and functional) to regularly have the SEG inspected and maintained as specified in those terms and conditions. Whilst inspection and/or maintenance of the SEG is the Customer's sole responsibility to arrange, Energy Buster can provide such services at its usual rates if requested.

The Customer acknowledges and agrees that they shall be personally liable for full payment of the Price for all works provided under this agreement and to indemnify Energy Buster against any claim made by the owner of the premises (howsoever arising) in relation to the installation of the Goods and the provision of any related Services by Energy Buster except where such claim has arisen because of the negligence of Energy Buster when installing the Goods.

 - (a) they are the owner of the land and premises upon which the works are to be undertaken; or
 - (b) where they are a tenant, that they have the consent of the owner for the Goods to be installed on the land and premises upon which the works are to be undertaken and to perform any related Services,

- 4.3 The performance estimate in the Site-Specific Design will be based on data obtained from the Clean Energy Council's System Design Guidelines for Accredited Designs or other reputable sources.
- 4.4 Energy Buster may provide the Site-Specific Design as a deliverable of the agreement, in which case:
 - (a) Energy Buster will provide the Customer with the Site-Specific Design prior to the expiry of any Cooling Off Period;
 - (b) Energy Buster will provide the Customer with a generic outline of the likely system performance estimate before providing the Site-Specific Design (to allow the Customer to make an informed purchase decision); and

If the Customer provides access to their Wi-Fi network we will connect their system to the inverter manufacturer's web-based cloud monitoring tool and show them how to access this. If any access fees apply these are the responsibility of the Customer. In the event the Customer does not have Wi-Fi, we will show them how to access the inverter from any Wi-Fi enabled device, and/or the inverter screen if the model has one.
- 4.6 Any variations to the Site-Specific Design will be documented, and signed-off by the Customer prior to installation.

 - (a) the application is rejected; and
