

Introducing Sensibo Pure

The only air purifier powered by Pure Boost™

Our smart sensing technology makes air quality better

Set and forget

Sensibo Pure constantly measures the air quality around you and using your phone geolocation and bluetooth, automatically adjusts its operation.

Stronger air filtration

When you leave the room and air quality degrades, Pure Boost will set the purification on turbo mode, so that when you come back, the air is safe and clean.

Always on, smart sensing

Equipped with an indoor air quality sensor, Sensibo Pure measures 24/7 your indoor air quality and turns on and off autonomously.

Outside air quality services

With Sensibo Plus, you can subscribe to weather and air quality services, completing the air quality picture to give you full protection.

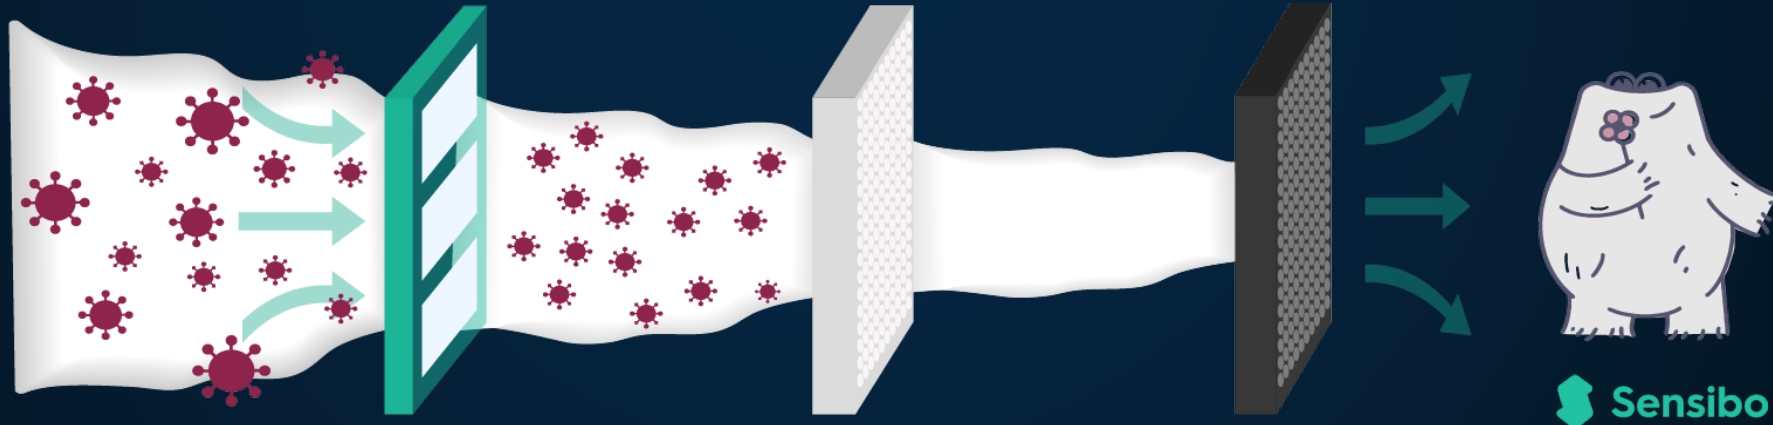

The most advanced filtration technology

Sensibo Pure smart air purifier removes with the PUREBOOST technology up to 99.7 percent of airborne particles, allergens, and pollutants as small as 0.1 microns including bacteria, viruses, dust mites, pollen, smoke odors, mold spores, pet dander, and airborne germs.

Pre-Filter
Larger dust particles
PM10, pollen

HEPA Filter
Viruses, bacteria, PM2.5,
fine dust particles

Carbon Filter
Formaldehyde, Acetone,
Cooking gas, etc.

Sensibo Pure

The only air purifier powered by *PureBoost*

- Our smart sensing technology applied to air purification
- Cloud controlled over WiFi and BLE
- Best in class 3-Filters purification system
- Senses indoor air quality PM2.5 level

Pure Boost (patent pending)

A smart sensing data driven approach to indoor air quality

- Seamlessly integrates with other Sensibo devices
- Boost air purification based on rich sensory data
- Use other smart fans/AC to increase air circulation into the filter
- Uses air quality sensors and 3rd party services

The Power of *PureBoost* technology

Smart WIFI capabilities

Control your purifier from an APP from anywhere and get the Air quality information and History including push air quality alerts to your phone.

Timer & Easy 7-day scheduling

Let the user set schedules easily & define scedules when to switch on the Sensibo pure and explore endless other possibilities

Location based operation

Turn high fan when you leave and before you arrive

Weather alerts

Notify the user when the AC is on and there's a nice weather outside

Presence React

Sensibo Pure will change its settings based on the occupancy of the room

*Works with Sensibo's Room Sensor

Smart integrations

Open API integrations with partners providing further energy benefits

*Works with Sensibo Sky

Technical information

- Constantly circulates the air in the room, covers an area of up to 220 ft²/ 20 m², perfect for living rooms, bedrooms, and offices. 
- 3 purifying filter stages :HEPA filter, Carbon filter, Pre-Filter 
- Medical Grade H13 True HEPA Technology 
- Whisper-Quiet Operation: Sensibo Pure is super silent . 
- LED night light with adjustable brightness. 
- Adjustable fan speeds to meet your needs, with our PureBoost autonomic operation you can reach a faster purification. 
- Easy filter replacement
